

SECURE SHREDDING

SECURE DOCUMENT DESTRUCTION WITHOUT A SHRED OF RISK

Secure • Compliant • Recycled

YOUR INFORMATION IS AN ASSET DON'T LET IT BECOME A LIABILITY

These days no-one can afford a throwaway attitude to information disposal

Ever-more stringent data protection legislation means companies face increasingly heavy penalties if they do not adequately safeguard data. Iron Mountain can help you take the risk and hassle out of the whole process. We can collect documents, hard drives, DVDs and CDs that are no longer required and securely transport them to one of our secure shredding facilities located throughout the UK. All documents and media are destroyed and we recycle 100% of paper records.

With Iron Mountain you can protect your business, and reduce your impact on the environment.

DESTROY, DON'T DISCARD

When you simply discard or recycle your business paperwork without an established secure destruction programme, you risk your business information being intercepted and inadvertently disclosed, with consequences for your brand and reputation.

While in-house shredding is an option, it poses problems. It eats up valuable time and effort, and there's a danger that staff are unaware of all compliance issues – not to mention the health and safety risks.

Iron Mountain can help you overcome these challenges with a secure destruction programme, including vetted and uniformed staff, highly secure transportation and a secure chain of custody from collection to destruction.

SHREDDING WITHOUT CUTTING CORNERS

Iron Mountain offers a complete end-to-end service with security at every stage. Whether you need daily or weekly collections, or periodic clear-outs, we'll work with you to design and implement a secure destruction programme to suit your business.

- Day-to-day service: A hassle-free service with locked disposal consoles sited in your office, which we collect at regular intervals. Simply place all your documents in the console as part of your secure destruction programme. We do the rest.
- Periodic clear-outs: We can visit your office to collect and destroy all documents, DVDs, CDs and hard drives that you are no longer required to keep.

We shred every document to BSIA standard EN 15713: 2009 level 4 / BS8470 level 4.

"We safeguard your valuable business information."

"We shred every document to BS8470 Level 4."

Our network of secure shredding sites gives you full coverage across the UK and Ireland

Industry leading security at every stage of the process

We provide a certificate of destruction and an auditable chain of custody

100% recycling policy for every document we shred

STAY COMPLIANT, GET CERTIFIED

The Information Commissioner's Office is now authorised to levy fines of up to £500,000 for serious breaches of the Data Protection Act. You can be penalised for disposing of information too soon, keeping it too long or failing to provide documented evidence of disposal. Under the legislation, hard drives, CDs and DVDs must also be securely destroyed.

You need to ensure data compliance through every stage of the shredding process. We can help you identify the types of information that need to be destroyed and when.

Iron Mountain provides a certificate of destruction and an auditable chain of custody, in accordance with the Data Protection Act.

"We provide an auditable chain of custody."

SHRED, THEN RECYCLE

Did you know it takes 17 trees and 26,500 litres of water to manufacture one tonne of paper? Or that, when discarded, the same tonne of paper will occupy three cubic metres of landfill?

At Iron Mountain we shred over 52,000 tonnes of paper a year for recycling. That's a lot of trees and water saved, and a lot less land filled.

You can monitor the positive impact of your paper recycling through our green report, which demonstrates your secure destruction programme is reducing your environmental impact.

"We shred 52,000 tonnes of paper every year for recycling."

£500,000

The maximum fine for contravening data protection legislation.
